Subject: Pumps

Anthony,

I want to provide a follow-up on the fire water pumps you supplied to our Galena Park, TX facility. The twin 5000 gpm pumps are working just fine. We certainly appreciate the support you provided for both the vertical pumps and right angle gear drives, as well as the support in selecting the diesel drivers and the skid fabrication. These units were far more complex than a typical electrical driver unit. I learned a lot about fire water pumping units under your tutelage.

You will certainly be on my bidders list for future pump needs.

Best regards,

Jerry Langley
